-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Drawings***

1. Figures 13-17 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

3. The instant IDS filed April 5, 2004 specifies an International Search Report as being submitted. The current file does not include any such Search Report. Applicants are requested to resubmit a copy of the Search Report.

***Claim Rejections - 35 USC § 112***

4. Claims 1-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1 and 10 include "a pulse-modulation process". However, the specification does not provide a description of the claimed "pulse-modulation process".

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Hossack et al ('228).

Per independent claims 1 and 10, Hossack et al discloses an ultrasonic transmitter that includes a transducer (16) having a plurality of transducer elements, a transmitting beamformer (12). Note the transmitting beamformer includes (see Figs. 8

Art Unit: 3662

and 9) a driving pulse signal generator (102, 122). The breath of claims 1 and 10 is such as to be anticipated by the structure disclosed by Hossack et al.

Dependent claims 2-9 are further provided by the scanning sonar disclosed by Hossack et al.

7. Claims 1 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Bradley et al.

Per independent claims 1 and 10, Bradley et al discloses an ultrasonic transmitter that includes a transducer (18) having a plurality of transducer elements, a transmitting beamformer (24). Note the transmitting beamformer includes (see Fig 6) a driving pulse signal generator. The breath of claims 1 and 10 is such as to be anticipated by the structure disclosed by Bradley et al.

8. Claims 1 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by the PG Publication to Poland ('461).

Per independent claims 1 and 10, Poland discloses an ultrasonic transmitter that includes a transducer (350) having a plurality of transducer elements, a transmitting beamformer (310) and a driving pulse signal generator (316). The breath of claims 1 and 10 is such as to be anticipated by the structure disclosed by Poland.
